# GRANITE

Granite began its life as liquid magma within the earth's core. Granite is a hard, crystalline, ingenious rock formed from extreme heat, comprised of various minerals such as quartz and feldspar. Dimensional granite specifications include high load bearing capacity, flexibility of cutting, ability to yield thin and large slabs and above all durability. Granite is a very strong and durable stone. It takes heavy gloss polish, popularly used as architectural stone for interior and exterior walls, floors and monumental stone.

## SPECIFICATIONS

### Rough Blocks:

270 x 160 x 140 CM+

### Gang saw Slabs:

270 x 160 CM+ (20 / 30 / 40 MM Thick)

### Cutter Slabs:

200 x 60 CM+ (18 / 20 / 30 MM Thick)

### Tiles:

30x30, 40x40, 50x50, 30x60, 40x60,  
60x60 60x90, 90x90 CM & Cut To Size.  
(18 / 20 / 30 MM Thick)

### Finishes:

Polished, Honed, Leather, Flamed, Antique

## APPLICATIONS

As a building material, granite stone is widely used for kitchen counter tops, table tops, work tops, bathroom counters, wall cladding, roofing, flooring and a variety of other interior and exterior applications. The stone shows consistency in color and texture and the hardness of granite lends it excellent wear.
